

Steve Miller

SOFTWARE DEVELOPER

✉ coding812@gmail.com

📍 Saint Petersburg, United States

☎ +1 (727) 798-0200

Profile

Passionate software developer skilled in C#, JavaScript, React, .NET MAUI, and Blazor. Committed to best practices and continuous learning. Experienced in front-end and basic server-side development.

Education

Codeboxx Academy, Saint Petersburg, FL

July 2023 — October 2023

My journey at CodeBoxx Academy exposed me to a wide spectrum of technologies and concepts, with emphasis on the MERN stack, but also React native for mobile development, and exposure to Ruby on Rails. The program specialized in helping me discover my passion within software development by going beyond the basics by offering individualized professional development and leadership training. Real-world business simulations, both individual and team-based in an Agile environment, prepared me for the tech sector. I emerged with a diverse skill set, and a drive to make an impact with my knowledge.

Projects

Professional site for Michael McDowell Phd., MikeMcDowell.online

January 2023 — February 2023

A very simple info page I built for Professor Michael McDowell Phd.

- HTML and CSS
- Worked with Dr. McDowell on his requirements for the site

HVAC Helper App

November 2023 — Present

In the process of developing a cross platform, React Native app for HVAC field technicians. This app will include various tools to perform their job more efficiently. Some of these tools are:

- Calculator for testing a start capacitor under load
- Duct sizing calculator
- Form for estimating complete duct system change out, with ability to export
- Subcool/Superheat Calculator
